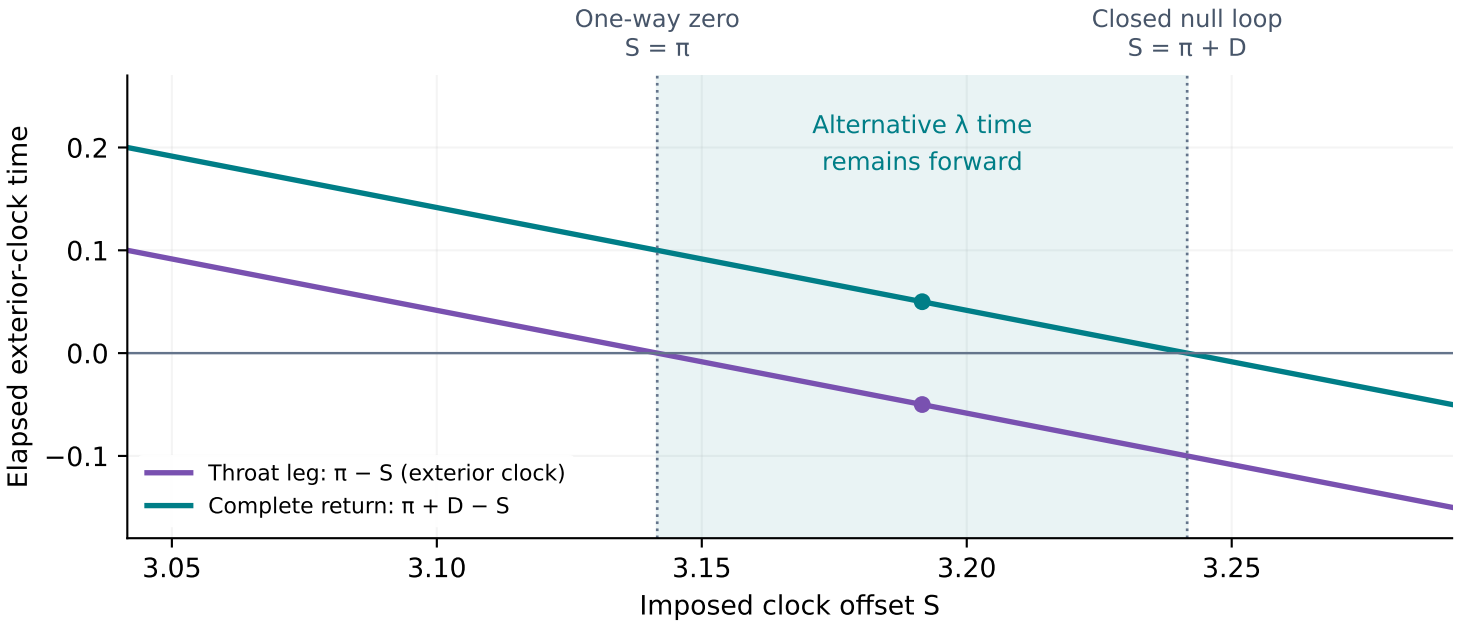
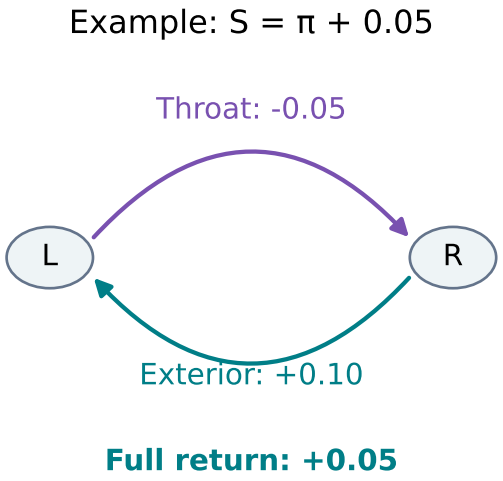
Solver time-ordering limit is not physical chronology protection

Prescribed toy clocks • No self-consistent source • Optical units, not seconds





Current solver additionally requires transit > D/2; π is not its exact failure point. Coupled λ-feedback is not yet implemented.

The shaded interval has a negative one-way exterior-clock elapsed time but a positive complete return in this prescribed graph.

No 4D stable medium or 13 → 12 Sep 2027 passage established.
