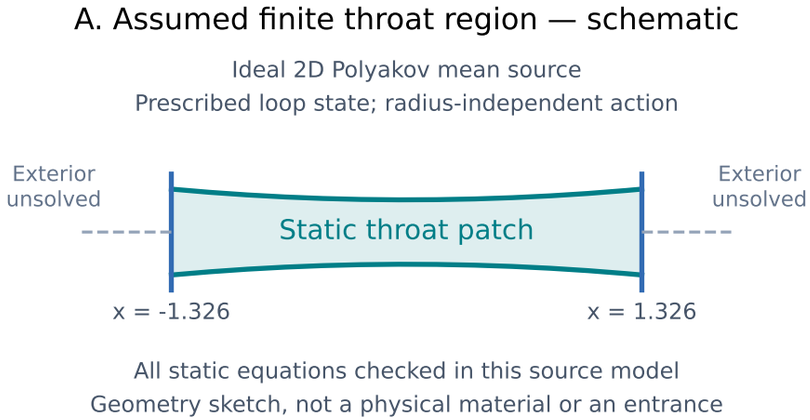
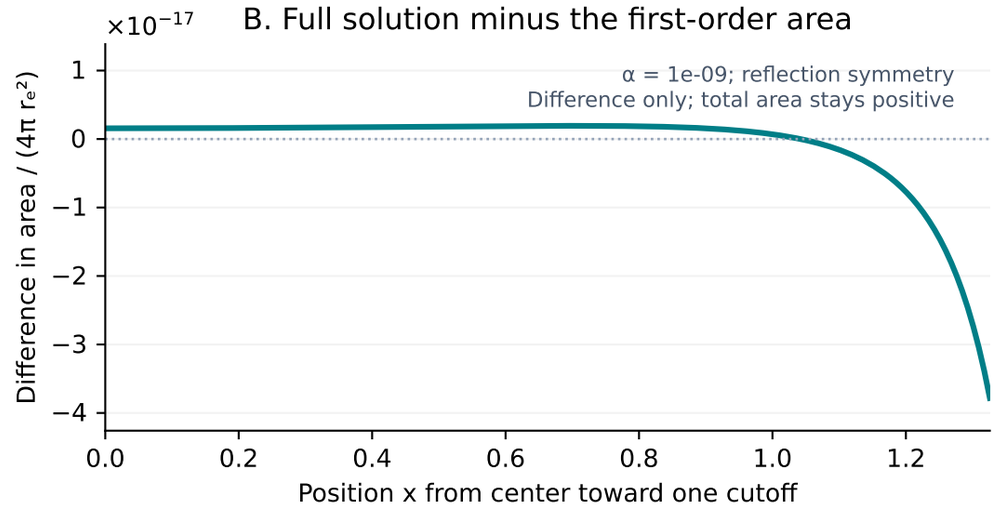
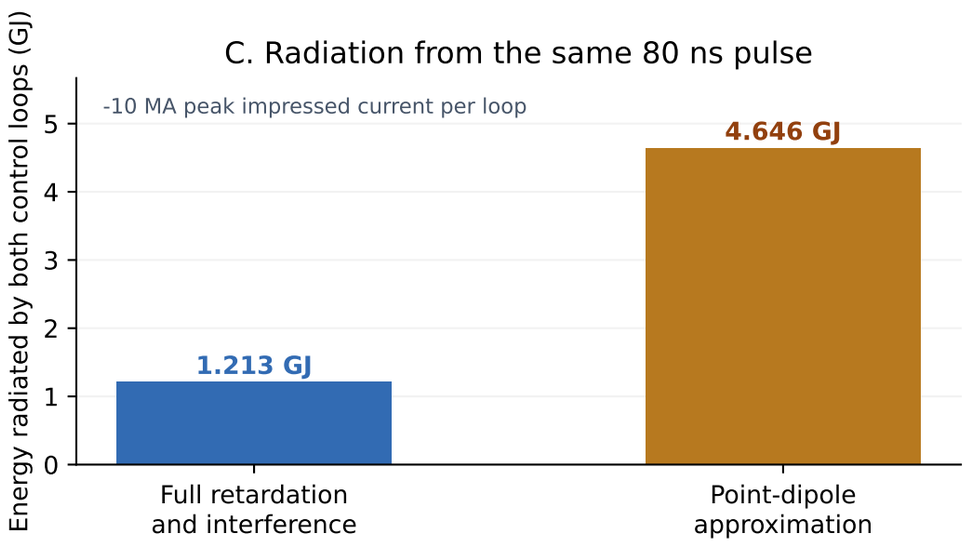
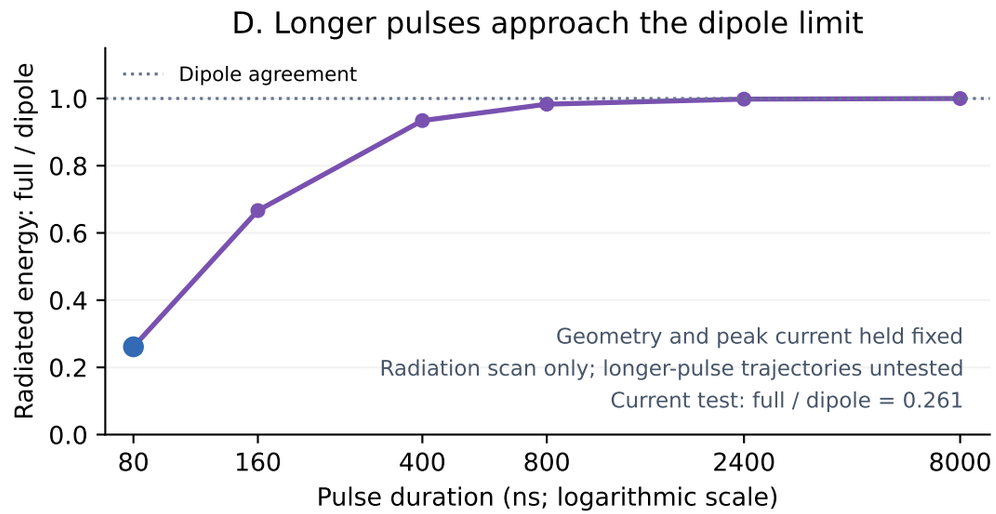
A specified quantum source supports a static model; its apparatus is unresolved

Finite throat equations solved together • electromagnetic source cost checked separately









Gravity: specified reduced quantum action; full 4D material, evolving stability, preparation and exterior matching remain unresolved.

80 ns pulse: 1.213 GJ radiated; one proton gained 83.23 MeV. Hardware and complete circuit energy accounting remain open.

13 → 12 Sep 2027: unproved. **13 → 14 Sep: time dilation is supported; the proposed apparatus remains unbuilt.**
