Source strength across a finite throat region

Fixed reduced geometry • Static observers • α = 10^{-9} • |χ| ≤ arctan 4

Sampled maxima (densest grid):
center 6.68e-08; strip 6.68e-08; ratio 1.00

Sampled maxima (densest grid):
center 3.69e-08; strip 3.77e-08; ratio 1.02

Downsampled heatmaps; sampled maxima use the densest saved grids, not display pixels.

Reversed peak unresolved: 0.6971% change versus 0.5% target. A separate source envelope was checked.

Conditional reversed envelope: 1.036e-07; a numerical estimate, not a certified continuum bound or stability proof.

No 4D source, stable medium or 13 → 12 Sep 2027 passage established.
