Field-following trial with regular poles: solid; frozen slices: dashed
Residual at local carrier k = 0
Metric derivative at k = 0
u / D = 0.0125
u / D = 0.0250
u / D = 0.0375
Norm of r0 times D
Norm of the variation of r0 times D
Integer flux q
General transport also needs r1. One state per flux; no supporting-source bound or atom passage.
